PROFESSIONAL SUMMARY

AI / Analytics Engineer with 3+ years of experience across analytics, data engineering, machine learning, and AI systems. Experienced in building RAG pipelines, real-time inference workflows, streaming analytics, dashboards, APIs, and LLM-powered applications using Python, SQL, Kafka, PostgreSQL, FastAPI, Power BI, and Docker.

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, Pandas, NumPy, Excel, Statistical Analysis, Data Cleaning, Data Validation, Data Modeling

AI & Machine Learning: LLMs, RAG, Graph RAG, LangChain, LangGraph, Pinecone, Vector Embeddings, Vector Databases, Semantic Search, Prompt Engineering, Feature Stores, Model Monitoring

Data Engineering: Apache Kafka, PostgreSQL, MySQL, Apache Spark, PySpark, Databricks, Apache Airflow, ETL/ELT, Data Pipelines, Streaming Analytics

BI & Visualization: Power BI, Tableau, Streamlit, KPI Reporting, Dashboard Development, Data Visualization, Trend Analysis, Operational Analytics

Backend / Cloud / DevOps: FastAPI, REST APIs, Docker, Kubernetes, AWS, Amazon S3, AWS Glue, Athena, Git, GitHub

WORK EXPERIENCE

AI / Analytics Engineer, Sagacious Monks Feb 2026 – Present

- Engineered RAG pipelines using Pinecone, embeddings, and vector databases, improving contextual retrieval relevance by **35%**.
- Integrated feature-store workflows for real-time inference, reducing online feature retrieval latency by **28%**.
- Built model-drift and inference-failure monitoring, reducing mean time to detection by **36%**.
- Optimized distributed GPU training and inference, reducing processing latency by **42%**; applied Graph RAG and retrieval optimization to production AI systems.

Graduate Teaching Assistant, UNC Charlotte Jun 2025 – Dec 2025

- Guided 50+ graduate students in SQL, data analysis, dashboard design, visualization, and analytical storytelling.

Business Intelligence Analyst, Zepto Technologies May 2023 – Jul 2024

- Analyzed 100K+ transactional records using SQL and Python and built BI dashboards for revenue, orders, inventory, customers, and operational KPIs.
- Automated SQL and reporting workflows, saving approximately **3–5 hours per week** while improving reporting reliability.

Data Analyst, Zepto Technologies Aug 2022 – May 2023

- Analyzed 50K+ sales, inventory, order, and customer records using SQL, Python, and Excel; reconciled data across 3+ source datasets.

PROJECTS

InsightPilot AI Analytics | Python, FastAPI, LangGraph, RAG, Ollama

- Built an agentic churn analytics platform with risk scoring, semantic RAG, explainability, and LLM insights; achieved **80.62% accuracy** and **86.63% churn recall**.

StreamSight Real-Time AI | Kafka, PostgreSQL, FastAPI, Docker, Ollama

- Built a real-time AI operations platform with Kafka consumers, anomaly detection, REST APIs, PostgreSQL persistence, live dashboards, and grounded AI summaries.

Retail Analytics Control Tower | Python, SQL, DuckDB, Power BI

- Built five management dashboards covering sales, customer behavior, delivery performance, geographic analysis, and operational risk.

EDUCATION

University of North Carolina at Charlotte Charlotte, NC
M.S. Computer Science – Data Science Concentration Dec 2025
GPA: 4.0 / 4.0
